DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-4, directed to a variable optical characteristic optical element utilizing at least two energy sources, classified in class 359, subclass 240;

Species II: Claims 5, 21-26, 38 and 39, directed to a variable optical characteristic optical element utilizing an electrostatic force or piezoelectric effect, classified in class 359, subclass 245;

Species III: Claims 7-9, directed to a variable optical characteristic optical element utilizing a magnetostrictive material and magnetic field, classified in class 359, subclass 280;

Species IV: Claims 10, 11, 16-20 and 27-37, directed to a variable optical characteristic optical element having a deformable surface and no energy source applied, classified in class 359, subclass 290;

Species V: Claims 12-15, directed to a variable optical characteristic optical element utilizing a photomechanical effect, classified in class 359, subclass 244.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement. A listing of all claims

readable on each indicated species has been provided. However, should the Applicant believe that another grouping of claims is more appropriate, a listing of claims readable on the elected species is required, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the **allowance** of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
